---

The Government e-learning Platform is a collaborative system.

The Government e-learning Platform shares and jointly uses its training system and content with public agencies as well as central and local training organizations, thereby creating cost-effective management and an extensive learning experience.
*Participating agencies: National Human Resources Development Institute, central administrative organizations, municipal or provincial partner training organizations, national universities, etc.

Operational structure for Shared-service

- 57 National organizations
- 17 Local governments
- 35 Universities
- 120 Public agencies
- Ministry of Personnel Management National Human Resources Development Institute Government e-learning Platform
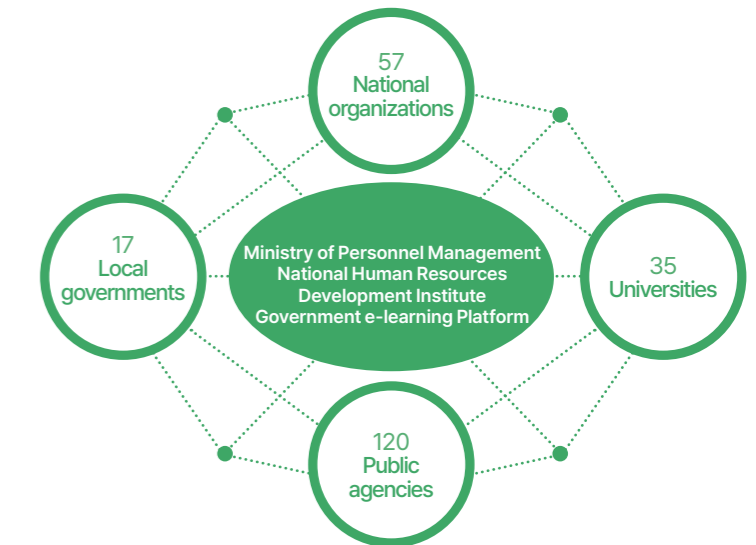

Benefits for Shared-service

- Sharing the training system and content increases the content usage by various sectors and lowers government spending.
- The system can train personnel in charge of systems and e-learning operations, collect opinions via e-learning conferences, and offer customized e-learning consultation for each organization.

Current state for Shared-service

Participating **229** training departments at **253** organizations
(as of late August 2024)
